Question 10.13.3.34

There are 1000 sealed envelopes in a box, 10 of them contain a cash prize of Rs 100 each, 100 of them contain a cash prize of Rs 50 each and 200 of them contain a cash prize of Rs 10 each and rest do not contain any cash prize. If they are well shuffled and an envelope is picked up out, what is the probability that it contains no cash prize?.

Solution:

Random variable	Value	Definition
X	0	cash prize of Rs 100
	1	cash prize of Rs 50
	2	cash prize of Rs 10
Y	0	Envelope with cash prize
	1	no cash prize

TABLE I
DISTRIBUTION

$$p(X = 0) = \frac{10}{1000} \quad (1)$$

$$= \frac{1}{100} \quad (2)$$

$$= 0.01 \quad (3)$$

$$p(X = 1) = \frac{100}{1000} \quad (4)$$

$$= \frac{1}{10} \quad (5)$$

$$= 0.1 \quad (6)$$

$$p(X = 2) = \frac{200}{1000} \quad (7)$$

$$= \frac{2}{10} \quad (8)$$

$$= 0.2 \quad (9)$$

Probability of envelope with no cash prize

$$p(Y = 1) = 1 - (p(X = 0) + p(X = 1) + p(X = 2)) \quad (10)$$

$$= 1 - \frac{31}{100} \quad (11)$$

$$= 0.69 \quad (12)$$
